Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 June 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This action is responsive to the amendment filed on June 29th, 2010. The examiner acknowledges the amendments to claims 1, 8, 16, 18, 23, 26, and 30, the cancellation of claim 17, and the addition of new claims 32-37. Claims 1-16 and 18-37 are pending.

Election/Restrictions

1. Applicant's election with traverse of Species a, claims 1-15 in the reply filed on June 29th, 2010 is acknowledged. The traversal is on the ground(s) that species a is generic to both species b and c. This argument is persuasive; accordingly, applicant is only required to elect between species b and c. In the response filed on June 19th, 2010, applicant has elected species b, claims 16 and 18-22, along with generic claims 1-15 for further prosecution. Accordingly, claims to species c, 23-25, have been withdrawn from consideration.
2. Applicant's amendments to claims 1-31 have obviated the previous lack of unity restriction and necessitated a new lack of unity restriction requirement. Originally described Groups I and II, claims 1-25 and 26-29 respectively, now have unity because both groups recite the same special technical features of an apparatus for treating urinary incontinence. However, originally described group III, claims 30 and 31, still lacks unity with groups I and II for the reasons presented below.
3. In summary, the species restriction of the apparatus claims still applies and applicant has elected species b, therefore generic claims 1-15 and species b claims 16 and 18-22 are pending and claims 23-25 have been withdrawn. The original lack of unity restriction was obviated by amendment, however this amendment necessitated a new lack of unity restriction, presented below, pertaining to now pending claims 1-16, 18-22, and 26-37.

4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- a. Group I, claim(s) 1-16, 18-22, 26-29, and 32-37, drawn to an apparatus for treating urinary incontinence and a method of using the apparatus.
 - b. Group III, claim(s) 30 and 31, drawn to an apparatus for inserting an expanding and anchoring vaginal device.
5. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical features of group I consist of an apparatus comprising a node, a support section, and an anchoring section while the special technical features of group II consist of an enclosure and a stopper. Since there are no common special technical features, the groups lack unity a priori. While the enclosure of group II is intended to contain an intra-vaginal device according to claim 1, the intra-vaginal device of claim 1 is not part of the structure of the device in group II and is only recited in an intended use clause of claim 30.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
